Similar concerns were raised with regards to sewer capacity. It was noted that the sewer system was installed in 1972 and not constructed to modern standards.

A member of the public raised the matter of the Peak Cluster pipeline. Concerns were raised that this encroaches on Hooks Wood.

A member of the public raised concerns with regards to the proximity of the proposed pipelines to residential properties, water contamination and wildlife should leakage occur.

A member of the public raised concerns with regards to the risk of leakage and the density of potential gasses that might leak. A large leak could potentially affect up to a 1km radius. Concerns were raised with regards to access in terms of repairing leaks.

A member of the public raised concerns with regards to how construction of the pipeline may impact the area.
